Distribution Charges Effective May 1, 2010

Distribution rates cover the cost of delivering electricity from local utilities to consumers' homes or businesses. This includes the costs to build and maintain power lines, towers and poles, and operate systems locally. It also includes items such as calculating charges and reading meters. These rates will be reflected on the "Delivery" line of your bill. For a glossary of terms, see the back of your bill.

Debt retirement charges for Peterborough are \$0.0067/kWh; for Lakefield and Norwood \$0.0070/kWh.

Allowances

Transformer allowance will be applied for General Service customers only with demand between 50kW to 4999kW. \$(0.60)/kW

Primary Metering Allowance for transformer losses – applied to measured demand and energy %(1.00)

Loss Factor

When electricity is delivered over a power line, it is normal for a small amount of power to be consumed or lost as heat. The electricity you use is multiplied by the loss factor (or adjustment factor) to account for these losses.
