

Notes:

1. Sanitary sewer connection located at center line of the lot. ($w/2$)
2. Water service location is 1.5m from sanitary sewer opposite side of driveway.
3. Storm sewer connection (if applicable) located 1.5m from sanitary sewer on opposite side from water service.
4. Electric service connection - 1200mm from the lot line.
5. Communications service connection - Minimum of 300mm from Electric service.
6. Gas service connection - 300mm from Communications service.
7. Variations from the above locations should only be made with the approval of the utilities affected by the variation. Variations in the location of the sanitary sewer connection shall be confined to the lower half of the lot as determined by the direction of flow of the sanitary sewer main.
